

RESPONSIBLE RAW MATERIAL SOURCING POLICY AND PRACTICES

Thai Rubber Latex Group Public Company Limited is committed to operating its business under the concept of “Eco-Friendly Products” by prioritizing efficient resource utilization, reducing environmental impact, and creating sustainable value for all stakeholders. The Company places great importance on sourcing raw materials that are high-quality, safe, traceable, and free from negative environmental and social impacts, supporting manufacturing processes that exceed international standards and aligning with our vision to generate sustainable prosperity for shareholders and society.

Policy Directives and Operational Guidelines:

1. Select suppliers transparently and fairly based on principles of good governance and equality, adhering strictly to relevant laws and applicable standards.
2. Promote the use of environmentally certified raw materials (e.g., FSC, PEFC, GAP) or raw materials sourced without forest encroachment, ensuring full supply chain traceability in compliance with the EU Deforestation Regulation (EUDR).
3. Avoid raw materials that generate negative impacts on the environment or human rights, and actively support fair labor practices.
4. Encourage transparent information disclosure—such as raw material origins, production processes, and chemical usage—enabling consumers to make well-informed decisions.
